PROFESSIONAL SUMMARY

Computer Engineering graduate specialised in Software Engineering, with hands-on project experience across full-stack development, data and applied artificial intelligence. I have worked on requirements, architecture, implementation, databases, testing and validation. My Final Degree Project, graded 9.5/10, was developed through three iterations of ErasmusMate. I am seeking my first professional opportunity in software development, full-stack engineering, data or applied AI.

SELECTED PROJECTS

ErasmusMate – Final Degree Project

2026

Next.js, React, TypeScript, Prisma, SQLite, Vitest, Playwright

- Designed and developed a full-stack platform for Erasmus mobility management, with workflows for students, coordinators and administrators.
- Built three iterations covering requirements, architecture, frontend, backend, databases, documentation and traceability.
- Implemented automated and end-to-end testing with Vitest and Playwright, plus continuous integration with GitHub Actions. Final Degree Project grade: 9.5/10.

orchestrator-b – Experimental software engineering pipeline

2026

Python, JSON, AI model APIs, validation, quality gates

- Developed a pipeline to generate, review and validate artefacts using multiple AI models, JSON contracts and quality gates.
- Recorded reproducible artefacts and evidence to compare full automation with manually orchestrated AI-assisted development.

Code: github.com/SamuCoco04/orchestrator-b

Personal portfolio

2026

React, TypeScript, Vite, i18next, CSS, GitHub Actions

- Developed and deployed a bilingual, responsive and accessible portfolio with light/dark mode and automated GitHub Pages deployment.

EDUCATION

Bachelor's Degree in Computer Engineering – Software Engineering | University of Seville | 2022–2026

Completed the degree in four years. Final Degree Project: 9.5/10.

Erasmus+ Exchange | Universidade Lusófona, Porto (Portugal) | 2025–2026

International academic experience in software, networks, cybersecurity and project management.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, Kotlin, SQL.

Frontend: React, Next.js, HTML, CSS, Tailwind CSS.

Backend and data: Node.js, Spring Boot, REST APIs, Prisma, SQLite, MySQL, MariaDB.

Quality and DevOps: Vitest, Playwright, Git, GitHub Actions, Maven.

Tools and AI: Linux, Figma, Mermaid, Codex, ChatGPT, Gemini.

LANGUAGES AND INTERESTS

Spanish: native. **English:** B1; currently attending language academy classes and preparing for formal certification.

Portuguese: academic and everyday experience during the Erasmus exchange.

Additional interest: applying software and data analysis to sport, particularly football.
